

Electrons are elementary particles.
They do not consist
of other particles.

THIS IMPLIES:

Electrons do not have details.
Nothing can be play the
role of Prime Meridian.

THEREFORE:

Electrons do not actually
spin around their axis.

is an elementary mug.
It does not consist
of other mugs.

FLAPDOODLE!

THIS IMPLIES:

Mugs do not have details.
Nothing can be used as
a handle to pick it up.

BOLLOCKS!

THEREFORE:

You cannot drink
any coffee.

INCORRECT LOGIC!

Electrons have an angular momentum,
so **OF COURSE** they **ARE** truly spinning around, smart arse!
However, we cannot ever directly detect this true rotation.

***DO NOT ignore the most plausible conclusion from facts
in favour of an ill-founded unverifiable concoction!***
