

Dear Mr. deGrasse Tyson,

I am a physicist like you, but until now a silent one and not a professor. I frequently watch your videos on YouTube. By simply rejecting anything not derived from observed phenomena or other *facts*, I found out that cosmology completely went astray into the fool's paradise, and you're all eating pies in the sky. Example: cosmological redshift is a **red herring**. Our common friend Einstein got his Nobel Prize for energy quanta (i.e. photons) that *don't change* whilst travelling. Where would the energy go to or come from? Cosmological redshift is a haphazard concoction like phlogiston used to be and it should not be relied upon. It was *not derived from facts!*

I just watched your recent video *What's Up With The New JWST Findings?* (<https://www.youtube.com/watch?v=GjgFR33-v-l>) about the current *MIS*understanding in cosmology, which is in obvious contradiction with what JWST is revealing.

I kindly ask you to thoroughly read all documents mentioned below. Please spend some time on it!

<http://henk-reints.nl/HR-About-me.pdf> (even contains a photo of me whilst I, urh, well, read the document).

<http://henk-reints.nl/astro/HR-Newton-Regulae-Philosophandi-Scholium-Generale.pdf> shows what Newton & Lavoisier wrote about assumptions and how Einstein restricted himself to that. He substantiated everything with *Erfahrung*, the German word for *experience*, i.e. *facts*, not fabrications. He did not pick from thin air. *That* was Einstein's strength, he was not significantly more intelligent than you or my grandson.

About relativity:

<http://henk-reints.nl/astro/HR-Relativity-and-curvature-of-spacetime.pdf> (explains relativity to a layman in such a way that he says he understands it **without** actually meaning *Please shut up with your incomprehensible blah blah*).

P.S. I have placed this letter on my website and I will put a link to it in a comment to *What's Up With The New JWST Findings?* (<https://www.youtube.com/watch?v=GjgFR33-v-l>)
