

Find ***persistent 100% regularities***
 in ***verifiably observed verifiable phenomena***,
 where 100% means 100% of ***ALL*** relevant experiments
 and ***not 99 point no matter how many nines.***

Induction:

Statistics: if the so-called ***p-value*** is ***small enough***
 then ***no*** longer believe the regularity is a ***coincidence***,
 hence, ***consider*** it a verifiable ***certainty*** or ***truth*** that can be
postulated as ***ascertained truth, axiom, law of nature.***

From there on:

ONLY deduction from ***ascertained truths***
 according to the rules of ***proposition logic*** & ***maths***
 is valid & ***nothing else!***

Reasoning definitely is ***NOT proper logic!***

***Thou shalt not think up any
 fundamental premise, crotcheteer!***

Per Iovem & Toutatem & Isim & Osirim & totum gregem!
By Jupiter & Toutatis & Isis & Osiris & the whole flock!

***ONLY already known truths
 should be taken into consideration
 for finding a possible cause of a
 natural phenomenon!***

Assumptions always sprout from ***nescience.***
 Hence, they have ***nothing*** to do with ***science.***

Science:

The Latin word ***scientia*** means ***knowledge.***

Turn your ***confirmation bias*** into a ***falsification bias.***
Don't come up with a ***theory***, but a ***deduction*** from ***truths!***

Ex oblerbatis phænomenis **non** deductum est:

Phlogiston

was a **thought-up flapdoodle** theory about combustion, already debunked by Lavoisier, Deo gratias!

Gravitation not being a force & geodetic equation of motion.

Ihre **eigene Worte**, lieber Herr Einstein¹:
zweimal **Überlegung(en)** im **selben** Absatz mit nur einer Linie dazwischen!

Ihre **eigene Worte**, lieber Herr Einstein¹:
Wir machen nun die sehr naheliegende **Annahme**, (...).

Ihre **eigene Worte**, lieber Herr Einstein²:
Rein logisch gewonnene Sätze sind mit Rücksicht auf das Reale völlig leer.

The fabric of spacetime merely is a **fully abstract concept, living in the human mind only.**

Cosmological redshift

i.e. **photon stretching** = thought-up **B🤖👉👉🤖CKS!**

Inflationary universe.

“These problems would disappear if”

is followed by a suggestion that's derived from nothing at all, repeat: **derived from nothing at all!**

It **severely violates** a **very fundamental axiom** of **physics** by **significantly exceeding** the **speed limit of light**, later “justified” with **gobbledygook derived from nothing** by **pseudo** “physicists”!

Accelerated expansion of the universe.

Cosmic expansion is the **growth** of the **Hubble distance**, occurring at the **very speed of light**, a **universal constant!**

They even won a **Nobel Prize** for their **morosophic concoction!**

Fons olla remota in nomine crepitus!

Wel pot-ver-non-de-knetter!

ΛCDM is a **fairy tale** based upon the latter.

This list seems not as complete as what might possibly be achievable, e.g. horizon problem, flatness problem, **JUNK!**
